

Sage Pro ERP | Top Seven Enhancements

Version 7.3 to v2010

SAGE PRO ERP v7.3

September 2004

Manage multiple companies more easily with Intercompany Transactions in Sage Pro 200.

Separate national accounts within the Accounts Receivable module in Sage Pro 200.

Improve customer service with the additional Credit Card Processing function.

Simple Item Forecasting by group in Inventory Control.

Easily synchronize existing users or add users with simple Copy User settings including hotkeys, privileges, data views, and favorites.

Increase efficiency of multicurrency transactions, billings, and reporting within the Job Cost module.

Efficient Credit Card Processing with Pre and Post authorization.

SAGE PRO ERP v7.4

October 2006

Organize key functions and access them quickly through Executive Dashboard in Sage Pro 200.

Easily route documents through appropriate channels with Document Routing for Order Entry and Purchase Orders in Sage Pro 200.

Streamline return process and easily track returned merchandise with new Return Merchandise Authorization (RMA) Module.

Increase turn-around time on customer quote requests with new Quotation and Bid Manager in the RFQ module in Sage Pro 200.

Simplify bill payments and payroll transfers with Accounts Payable Electronic Funds Transfer (EFT) and Enhanced Payroll EFT.

Maintain efficient and organized inventory tracking by utilizing Bar Code and RFID identification through Inventory Control module.

Update customer status from vendor to customer or vice versa with enhanced merge capabilities.

SAGE PRO ERP v7.5

October 2008

Keep track of products from conception to completion through enhancements in manufacturing modules like Work In Process.

Easily develop and track schedules with enhanced capabilities within manufacturing modules.

Provide greater detail to quotes, scheduling, and general analysis with Landed Cost functionality.

Effortlessly integrate manufacturing costs into Job Cost analysis.

Increase productivity with added drilldown capabilities in customizable reports.

Ensure complete and effective input with Data Integrity Tool.

Seamlessly integrates with Sage Payment Solutions for increased efficiency and function for credit card transactions.

SAGE PRO ERP v2010

October 2009

Reserve inventory for preferred customers, keeping them satisfied and eliminating the risk of penalties for undershipped orders or if stock gets too low.

Streamline reporting and stop paying extra for custom reports by creating custom filters and sort options for your reports.

Stop wasting time cleaning up report data. Export formatted or unformatted data from the report option grid to Microsoft® Excel®, HTML, XML, ASCII delimited, or text.

Save time by accessing your favorite data drillers quickly and easily using a new tool that lets you create and define Dataview Groups.

Streamline data import with enhanced features, including a status display, unmonitored import, imported line-level descriptions, and import and export of vendor cost levels.

Enjoy enhanced flexibility in exporting data by choosing to export your tables and fields in Microsoft Excel, ASCII Delimited, XML, or CSV.

Save money on payroll by printing check stub overflow to blank paper or a separate printer for checks with more than 12 advice lines.
