

Sage Pro ERP Product Roadmap

Our ultimate goal Sage Pro ERP is to be responsive and flexible in meeting the needs of our customers while still providing clear insight into the direction for Sage Pro. Our number one priority is to ensure each product release includes valuable improvements for your business. This Product Roadmap includes the themes and estimated release dates identified and planned for the next several years.¹

Sage Pro Future Product Releases

Product Roadmap

Many customers select Sage Pro because of its ability to be highly customized to meet the unique needs of their business. We recognize that implementing an upgrade in a highly customized environment may result in additional implementation costs and longer upgrade cycles. While upgrades are provided every 18 to 24 months, support is extended to the current version and one version back.

Sage Pro Future Product Themes

Sage Pro is an incredibly powerful and full-featured solution and we are committed to making it even better! Along with the themes of our Product Roadmap, we use a Product Backlog as our living prioritized list of the improvements currently under consideration as we plan for each new release. This backlog represents the most frequently requested customer improvements. Based on our customers' feedback, business partner input, survey results, customer site visit observations and market analysis, we select the most frequently requested improvements to include in future releases.

The following is a sampling of the anticipated themes and estimated release dates through 2014.¹

Version	Themes
Sage Pro 7.5 Released June 2008	<ul style="list-style-type: none">• Landed cost module• Implement Work In Process (WIP) in Mfg modules• Enhanced Dashboard• Manufacturing integration with Job Cost• Enhanced drill down capabilities• Client Feedback link in product

Your Feedback is Important!

Sage is committed to your business' success and welcomes feedback on how we can improve the software to continue to meet your needs. As plans progress on each of our future releases we will incorporate many of the features and enhancement requests that we receive from our customers. Please submit your enhancement suggestions to our Product Management department at <http://www.sageproerp.com/products/feedback/>.
